DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-61 and 65-78, are drawn to a method of generating a favorite channel list based on a user's channel selections, classified in class 725, subclass 47.
 - II. Claims 62-64, are drawn to a system for identifying a viewer and displaying a favorite channel list based on the viewer's identity, classified in class 725, subclass 10.

2. The inventions are distinct, each from the other because:

Inventions I through II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility such a remote control that determines the user's favorite programs by analyzing the inputs entered on the remote control. See MPEP § 806.05(d).

Invention II has separate utility such as an monitoring device that determines the identify of a viewer and instructs a set top box to display a list of programs based on the user's identify. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for reexamination purposes as indicated is proper.

Art Unit: 2614

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
